Task B: A Memorable Day. I think everybody have their own memorable day in life. And for me it's a day when I was on the concert of my favourite group called "ALPHA". Actually, I have been waiting their concert in my city, for a long time. So I was very happy when they posted a video with this great news.

On the<sup>x</sup> day, I came to concert earlier than other people. Because my ticket was important. So I had the chance to meet them close. In other words, I had chance to take a photo and sign of every member. By the way, on the concert I met ~~two~~ Poland fans. They came to Kazakhstan only for the concert. And when I heard this, I was very proud of my favourite group and my country. They didn't know Kazakh language, so we spoke in English. I think it was very good experience for me. We (are) stayed together for whole concert and enjoyed every moment together. All fans were very happy and also very energetic. The concert atmosphere was very very cozy and cute. In the end, I want to say that the concert was fascination.

And then in the evening we all went to the camping. There was so cool and we with Alistar sat around the fire and grill potatoes. And he went out from everyone and sat in the middle of forest and play some wordle games. I was so happy when he start say that my English level is not bad. I tell him I can crush a language barrier and now I can have communication with whole world. When I went to the home. In the first I download the app where people in the different countries can talking with everyone. I meet so many people and talking with English helped me to consider in learning languages and culture of another nations.

#### Task E: A local issue

I'm gonna talk about our local issue in the city of ours.

First issue is education system.

I don't like that in our city there are only few schools. Our school is full there are no empty places therefore all classes is occupied by others and we cannot move anywhere and plus our school is small and old. I want more schools and I think teachers should bring something new to our lessons and to the way they teach. I think if these problems was solved our country and economies would be better and at the world countries rank.

Second problem is ecosystem. There is a lot of trash lying on the ground there is no trash cans for recycling plastic makes air dirty and unhealthy

Fruits and vegetables not of the best quality and because of that  
that people often gets sick and there is the 3rd problem medicine  
& in our hospitals employees are usually are not trained  
how to take care of patients. I think if people start to solve  
this problems that holds us back and ruins our societal  
live quality and our country would go on a very high level  
and this problems doesn't apply on our local city there are  
in whole world, so i hope that someone will listen to me  
and we all together will more live better.

Yes, nowadays since 2021 I have been learning it, and it is vividly became my hobby and routine at the same time. That is all I can say about me, hope you reached all the plans you were chasing.

## IV Writing. Task A.

A future <sup>to</sup> letter to myself. In this letter I'm going to share with my thoughts, worries and plans. It will be an interesting thing, to have secrets with paper of list. Therefore, someone says that writing your thoughts, might help to drive away all your concerns you have in your mind. In this situation, my mind, will be here, wishes, promises and other.

This special letter I'd like to start with short story, beginning. I have good memory for certain things, because my ~~future~~ <sup>old</sup> grandpa connected with my future.

Only two years ago I was looking at the world through naive and childish eyes. I didn't have full meaning of life and especially future. Approximately I knew about my future profession, but was insecure about that. Starting to think more mature, I started to develop my knowledge. Spending less time at the phone, playing video games, getting alone with classmates and what I could proud, I at least started to try reading the books. "At least" because I

never did that before by my own. My ninth grade I spent almost similar, still with some worries but not alone. I got my best friend, cheerful, honest and same thoughtful person, as like me. Now I'm in tenth grade, unfortunately we don't talk to each others anymore and I'm getting use and trying to handle lonliness. Our friendship was best what I could wish, we're not together now. However she gave me an brilliant experience. In the future I see myself as confident and brightful person. Maybe I'm bad with discipline but I'm good in self-esteem, what I really like. It's not end yet. I'm only on my blossom of life. In my fifteen year's old soul.

To my future self I wish only the best. Even if there's difficulties. Troubles are only for certain time, though they help to step on another, higher degree of life. Just, future myself, you have to know and keep living with your child dreams, even if you're adult, no shame, only the dreams and goals. Especially when you want to become poetry and lawyer at the same time. There is a beautifulness in simplicity.

I am the first born in my family. The oldest one after my parents. I have been looking after my siblings and caring about them since I was 12 years old. And maybe even earlier. I surmise that before I turned fifteen, my parents didn't even consider me as a teenager, but as a baby or a toddler. Now that I am 17, I can say with no doubt, that they totally see me as a person with my own thoughts and emotions and feelings. They listen up to me, when making a decision. And I am fully aware, that it is one of the most important parts in being a happy and healthy family. Even tho teenagers sometimes can be angry, annoyed and even say hurtful things, not purposely, because of hormones it is very important to listen up to every family member and their opinion. Also, teens are used to modern world more than their parents, and sometimes they are more aware about some things, so their impact can be very useful to adults. Teens are very sensitive and will feel very proud of themselves if their thoughts will make an influence on family decision-making. Household chores, financial problems, and probably school problems too. When looking for a solution to any of these or other problems if parents can make their kid feel heard, like his opinion means something to them, I am sure the teen kid will take more responsibility to himself.

Most people always make differences between girl and boy. In our society, there are too many gender stereotypes that affect to teenagers' careers.

Firstly, people in the past think that only man can be policy or lawyer and woman should sit at home while doing house works or babysitting. There were no professions for women and girls could not even study. These rules were against of most girls' dreams. Most woman could not achieve their goals because they did not have a choice. However, time changes and now both girls and boys can have education.

Secondly, if boy dances or sings then he is a girl. Most people say that dancing or singing is girls' job. And even some parents are against when their son wants to dance. And pink is girls' colour, blue is boy's colour. Because of this stereotype most teenagers hate this colour, and some of them start to bully a boy who wore pink.

In conclusion, we should solve these problems because of that most teenagers rejected their changes to achieve their dreams. And in our society, there should be gender equality in career guidance.

It is not a secret that person's sense of responsibility builds from the young age. So parents have to ensure that their child is enough responsible since their childhood. One of the ways to do that is to consider teenager's opinion and their decision while solving problems in the family. This (he) will help them to feel enough important and influential, therefore, making them more responsible. The family is the first place where teenagers learn to express their own opinion and provide solutions to some problems.

If the youngsters take part in family decision-making, there will be higher chance that teens can become a confident and perspective in the future. The importance of teenager's influence in making decisions is essential.

However, not only teens will benefit from the influencing in family decision. Also, there are some advantages for parents due to the fact that their child become more responsible and will do household chores. So it means that parentals will have more free time for themselves. Considering that both teens and parents will benefit from such development, the role of teens in decision making is significant.

Writing. Topic D

Gender stereotypes are considered to have significant impact on how teenagers choose their career. This essay will discuss an origin of such phenomena and give appropriate solution.

First and foremost, history noticeable effected on people's life. Were it not for ancient humans' behaviours such as considering men stronger than women, and humiliating feminine, modern life would not have such issue. Talking about people at present, they still tend to have 'pink for women, blue for men' problem. It is also affect of history, when men did "hard and harsh" job, while women were not allowed to do them. As a result, teenagers nowadays likely to think in such way too.

The solutions are to raise awareness by social media and use government as the major tool. Not only bloggers can explain gender equality ideas, but also government can create a law and organise equal gender treatment in the workplaces.

In conclusion, in no way should young generation choose work just because society wants so. They should go by career ladder that they consider as appropriate by their opportunities and ambitions.

D) The impact of Gender Stereotypes on Teenagers' Career Choices.

Nowadays there are various choices of jobs. You can become anyone you want and almost anywhere. However, there are some careers that for example require physical strength, endurance and so on.

Almost every person who works in such places are men. Of course, women also work in these careers. Gender stereotypes influence on Teenagers' career choices. For example, if a man would like to work as a chef in restaurants, some people would think that

being a chef is only for women when it's not. If a woman wants to start her career in military, others will say it's only for men.

Yeah, such jobs require physical and mental preparation, but if you're ready you can become that. It's a huge advantage that you can work in any job no matter what your gender is. ~~If you're ready~~

If you have a life in your mind, especially in the job you chose, don't stop. Don't listen to other people, just get better and better. Go for your dream and never stop.

My favorite season

My favorite season is summer. On my opinion, there is a lots of people who loves summer and i think there is a reason for them to love it. My favorite season is summer for a reason too. I prefer summer because i enjoy sunny and warm weather and don't really like cold and rainy weather. I don't think that cold or rainy weather is bad, but my mood depends on weather sometimes. If it's rainy and outside, i'll be in bad or sad mood. Also, i love summer because i am volleyball player and i enjoy playing volleyball outside with my brother

or friends. It is such a good feeling to play your favorite sport with your people. I think every person should try it. Other reason why i love summer holidays. On holidays you can do everything you want to, or just chill lying on bed all day long. On holidays there is no school, ~~and~~ and home work, so there is nothing to worry about. That is not all the reasons, but i ~~hope~~ hope now you understand why summer is my favorite season.

My dream job.

It's quite difficult to choose one profession.

Some people know what to choose since their childhood while others still don't. Actually, these people who have many hobbies or don't have hobbies at all.

I wanted to be a vet when I was a child.

Because, I wanted to help animals and I still do. But I refused to choose this profession. I <sup>also</sup> wanted to be a fashion designer, but I refused again because of lack of skills.

I'm an introvert and not sociable person. I like to work alone. So I'd like to work online, at home.

Task B: My dream work.

In my childhood I dreamed become rich, and I dream it still now. But for being a rich you must <sup>to</sup> work. When I was young I want to be a

doctor. There have I no. I scared of blood. In an  
tion I thought about being a teacher. It's con-  
dent for me I think. Because you can teach,  
learn students to something new. You can  
presents from students. And you can enjoy with  
giving a bad marks to students. But my sister is  
a teacher and every day she arrives home angry  
(~~bar~~) like chihuahua (if you d.k. It's a <sup>very angry</sup> dog) She often  
says that she's stressed. And It's an big prob-  
lem for me. Now I want to be a stewardess. The  
reason of that they can earn a lot of money  
and they can be every where. (A) Big + is that  
they have sales for tickets maybe 40% or 50%.  
and holidays in abroad. I really love air, space  
and flying. It can be my right choice.

1. My favorite season is winter. usually i always feel hot, especially during summer, so it's refreshing to feel the cold breeze on my skin just by watching the pure snow outside of my window, makes i feel at peace and it gets me in holiday spirit. During winter i enjoy baking chocolate cookies, making gingerbread houses with my family, decorating the house with knick-knacks my dad bought, wrapping presents. Winter will always make me feel nostalgic, as i always cherish every new year with my loved ones. If i could bend the weather to my will, it would always snow. It may sound cheesy, but winter just brings me hope for the upcoming New Year, or the never-ending possibilities, that time will show. Christmas time is just a magical time, and i feel like no one can argue with that.

I think that every season is nice but if I had to pick one I would choose Summer. Why? Well, there is lots of reasons and one of them is that summer is time when school ends and summer break starts. Also there is many sports that you can do in the summer, my favourite sports are streetball, football and cycling. And I like summer because it's always hot and sunny sometimes it might rain but it's really rare. Last year record temperature was over 40°C and it didn't rain even once. There is lots of summer activities they are really fun and interesting one of my favourites are going on beach with my friends and playing volleyball or swimming. There is a one main reason why summer is my favourite season is that my birthday is in summer. I celebrate it with my family or friends. Every year we go to different places to celebrate it. Last year I went to Almaty with family. On the first day we went hiking on the highest mountain. We hike for 2 or 3 hours after that we were really tired exhausted. It was hard but we did it and then went back home. I think that it's one of the hardest things I did in my life. And there is one more thing I did. I beat my own record for the longest cycle

distance it was 100km in one day. I spend 250 hours to do that but cycling wasn't as exhausting

as hiking. Had I could continue missing about all reasons why I like summer but

there is 100 many seasons.

My dream job

My dream job? Ah, yeah. Not an easy question to answer, I actually have a couple of them. So first and foremost, I can't really get into the fitness industry. I like sports and I wanna pursue it, if I have a chance. This is not a guaranteed though. I wanna pursue it, because I personally really enjoy it, I don't really have anything else to say about it, it's just a part of me, you know.

Second of all: Lawyer. I'm interested in it. Because it might be one of the more realistic ones and it pays well. Sure, it's not easy when you go a person and a right to defend. But if I study well enough and be prepared, I think I can pull it off. Also let's not forget that, if we finish law school there are a lot of other careers I can look into. For example, government jobs, politics, etc... Also I'd love to run a law based company, if I end up being successful.

Alright, that's it for now. I'm aware that I will need to work hard, study hard and know basic business, if I wanna succeed in these fields. Now, excuse me, if I didn't really answer the question, I'm just not really sure of it currently...

Task - D. Letter to Grandma

Hello Grandma!

How you going?

I miss you so much! I'm waiting for a week to see you, but I can't because I have a lot of job projects. Ross yelled at me yesterday because I late. At tuesday I bought little cake and teddy bear toy for mom, she were very happy! I'm so proud for myself. If you want I can bring you bento cake this weekend.

Oh! Also, I learned to cycling, it's funny that I'm fourteen, but I also can't it cycling normally. I'm think to have registration in fit with my bestie. In my opinion it will be fun if we both together go to train hall. If you can, please bake some pancakes with strawberry jam to this sunday. I'm planning to come!

Okay, see you soon beloved grandma!
