Hello my dear pen friend. I've read your letter that you sent to me, and I understood one large thing from your letter. Your parents are really good parents, ~~but~~ however they care about you too much. This is the main problem. Not going to lie, I have the same parents, albeit I'm almost 17 and this problem is not problem for me anymore. Okay, I got you ~~on~~, but I can't understand why you don't ~~to~~ want to spend your summer with your siblings. I know, probably your siblings are really sucks or stupid, and that's why you don't feel like spending time with them. I have no idea who they are and their personality but YOU ~~are~~ can spend time all your summer time at home and in your home town, personally ~~for~~ for me it's so lit. If I were you, I would be glad, I'm sure. Okay, ~~then~~ ~~the~~ consider I solved your problem and I have ~~for~~ ~~you~~ several decisions for you. First one is to escape to summer camp. I know it's crazy and you will be looked goofy ~~from~~ in people's eyes, although it is one of the ~~the~~ least options for you that can perhaps work. Okay ~~is~~ okay. If you wouldn't like to choose ~~the~~ that variant, so you ~~are~~ ~~definitely~~ ~~can~~ would definitely like this one. Second one is to tell ~~some~~ somebody (to it's best to other ~~adults~~ ~~person~~ persons) about your problem and ask them to ~~change~~ change your parents' minds. From my researching, it would be working plan in 65%.

So I think these my suggestions will help you with your problem. Okay, ~~got~~ I got to go, see ya, later.

I think bicycle is very important thing that changed many people's life. Bicycle can be two tired, three tired and four tired, so it can be useable for any age, it can be any size, small or big, it can be simple, for mountain road, for kids and for delivery. Bicycle was invented many time ago (I don't know the date) and since this time people's lives have changed, because it's very nice type of transport, it has pluses and minuses (like all of things in our world), and pluses more than minuses. Pluses: It's soft, doesn't take much place, can ride without fuel, you can go to near places and ~~spend~~ don't spend too much time. Minuses: you can't go to far places, bicycle works by your power (if it isn't e-bicycle), you always need a bicycle parking. In our days, when we have e-bicycles (e-bikes) many people like to ride simple or any more type of bike, because e-bike is the more expensive than simple bike, but e-bike has very interesting things. It's an engine that changing by electropower or when you spin a chain on the back ~~wheel~~ wheels, so if you tired, you can turn on the engine and drive it like motor cycle. ~~Bicycle~~ Bicycle is very important thing that was invented, because of bikes our lives became so much easier.

Hi Mary,
I am really sorry to hear that you're terrified of dogs. It must be awful to not be able to go to your friend's homes if they have dogs. But I think I can help you. I want to give you some advice about what you should do to not be scared of dogs.

First, you can watch a lot of funny and cute videos of dogs. You will realize that there are many dogs that are not scary and they just want to play with you. Second, if your friend has a friendly dog, you should go to a walk with him and his dog. You will see that dogs actually are really friendly, loyal and adorable. Third, you can go to a park and look at dogs from a distance. You will see that they can be very sweet and not scary. Step by step you will see results if you follow my advice. The most important thing is you should face your fear. There is nothing to be afraid of in the world. You can do everything. And I will always be on your side to cheer you up. And if nothing will help you you must go to a professional and I hope with my whole heart it will help you not feel terrified every time you see a dog.

Please, tell me if I somehow helped you. I will be glad to know.
Best wishes, Dariga.

Recycling is a very important thing for our Earth. It will save not only our planet, but, ^{our} lives too. So we must have especially attention on it.

I think, our country is not very clean ~~at~~, as well as other modern country, like in Europe. And so how and why they increased their ecology? How their problems disappeared? It's really hard work for ~~our~~ government, for people, although, it seems not, because we have an idea and plan, but we don't do it. These countries started using alternative energy, resources and use they for benefit things. And authorities do that not alone, they do it with people's help.

However, most of people in our country have not care about this. They are all problem's blame on government. And, yes, ^{most} of responsibility have they, but we must do little things too. Just little work, like recycling, cleaning, using less of resources and goods, and we will ⁱⁿ have big progress!

To stop pollution ⁱⁿ our country, ~~when~~ we have a different ways. But most benefit is recycling. Government must take a law about ecology.

Because of all of that, I agree with this topic. If ~~we~~ our country wouldn't been strict, rather, we will be in really important threat. We must something fantastic and do little more to future.

Many of us think that

(Nowadays) a huge amount of things that are learned are not contained only in books. I would say that I agree with the given statement because of the same reasons.

To begin with, we are living in the world, where everything is in the process of development. There are new technologies such as computers, mobile phones, using what we can find out a lot of informations or whatever we want. (People)

It is true that some things that are learned are contained in books. (Also it is) However nowadays people tend to work and study online which make us likely to use internet sources in many cases.

On the other hand, I believe that we can learn a lot of things from practices (and) that we experience in our social life. Communication with other people help many of us to find out things which they can not get from the books or internet. I can give example to this from my own life. Working in a public place where I communicate with different types of people. They were angry, kind, rude and anxious, but I realize that there are approaches to those for work with them. Also I learn how to behave in a public places, get more experience in 2 months than 10 years before, and without reading book or something else.

In conclusion, I would say that we can learn much more things (than from) in our everyday life than from books.

① "Technology has made the world a better place to live". I agree with this statement. I think technology make our lives a lot better. I can not imagine my life without mobile phones, computers and internet. It pretends a part of my life, like a water, food or eyeglasses.

XXI Century is century of Technologies. Because before now, people don't know what internet is. They used libraries and books to find information about things that they need. They used to go to special places to write or call someone in another city or country. But now, all of these stuffs we can do in a second. Mobile phone give us ability to communicate with our relatives or friends with videocall or sending them our photo above thousands of kilometres. It is a great plus of our century.

Also internet is a good stage for study online now exists a lot of online courses that helps to study at home, without going outside. Another plus of internet is online shopping. If you live far from big city with good and big shops, you can just go to website of this shop and order whatever you want. Your package will come in a maximum in one week. It is very comfortable if you busy too.

All of these plusses can explain why technology has made the world better place to live. Living in our

A) Should teenagers go to work?

This issue is very popular nowadays. When teenagers are on holiday, they will probably want to earn some money. Sometimes even their parents don't know that he or she works. So, is it worth working if you are a teenager? In my opinion, it depends on your life. If your parents can provide the family, you shouldn't. Instead, you should learn some new skills, languages and study. That way, you'll be better and better. Especially ~~if you~~ when you have free time. You can devote your free time to develop yourself rather than working. But, if your parents are divorced, or they can't buy food ~~the~~ my answer will change. I think, if you're in such conditions, you have to work! You have to work and study to have a happy future. Also, if your parents don't allow you to work, you should listen to them. I'd like to give you my advice if you decide to apply for a job being a teenager. You, your parents and your boss should know that you're working there. And when you're applying for a job take your one parent to sign papers about your schedule and salary. In this way, if your boss doesn't ~~give~~ ^{pay} your salary you'll call the police.

It has been said that "Not everything that is learned is contained in books". Everyone was a student and everyone had to read a lot of books and works. We were always said by our teachers that knowledge, which we get from books, was very important and useful for our future. But how trustable are these words? Is it true that from books we can learn more than we do by our selves during our life?

Of course, a lot of information, including useful or not, is learned by us during 11 grades of education at school. There we can get how to do math or how to write and read. With no doubt, we get our main skills from our first years at school but other time we have to learn much extra information that we would never use in our real lives. In my opinion, main lessons are given us only by us. Everyone do mistakes and 1/5's okay, but next time we are trying not to do them again. Some things can be learned only by our own experience. Our teachers cannot tell us how to live whether it's the first and main thing that we must understand. The best teacher we understand is, as before and easier we can live. How to be happy, how to be calm, and just how to think, how to believe in ourselves, how to understand other people and how to love. Our schools and universities are not able to give us any main knowledge, the most important skills and opinions for living and the most important - the purpose of life. Unfortunately, not everyone can understand what do we need to learn first, what we cannot live without. No one can give us that straight of lessons, that experience which we can get only by our selves.

To sum up, I can say that of course, we can get a lot of know,

interesting and useful knowledge from books, we can even get how to recognize people's behavior and motivation. But the main lesson we get only from our, not someone, life. We cannot find our own experience and feeling that we get by ourselves anywhere. The best teacher, the best book, the best source of abilities and mistakes, lessons, thought will always be our mind, our life and our own life.

E)

I really miss the old days of mine sometimes. If I could go back to some period of time and stay there in the past for a while I would return back to my childhood years. Because I think that child hood is the best period of time which I would like to go to experience again. It is impossible to describe with words what being a child feels like. I am pretty sure that the huge amount of people would agree with me because childhood is priceless.

There are a lot of reasons for that. I think we experience a lot of our vivid and joyful memories while we are kids. I remember that I was enjoying everything when I was a child because the world we were living back then was without any obstacles and duties. The only things we were doing were playing, eating, watching cartoons and a lot of stuff like these. But now we have a lot of things to do on daily bases. The society, parents, school requires a lot from us. In other words that's the reality of being adult. I am sure each of us has monotonous daily routines and obligations that we can not ignore. Sometimes we want to escape or run away from all of the problems and life decisions. Every day we have to learn something and developpe individually to become a good person and reach our goals.

My years passing all of these things getting even harder, so these are the factors which makes a childhood priceless and amazing. Coming back to the beginning of the topic, I would like to write about some places I went as a child. As a child I was travelling a lot with my parents and relatives. However, the one which I solidly remember is our camping party. That day was one of the best days of my life which I will never forget.

Question F:

People have a lot of important characteristics. For example, society appreciate honesty, intelligence in people. But, many of them can ask themselves about "What characteristic is the most useful and important in our life?"

From my point of view, I can clearly say that, to build a strong and successful personality there are should be the complex of characteristics. You cannot be only smart person only be a smart person to really become great and successful person.

The best thing which you can do to grow yourself is trying to work with it. Try to work with your mindset. If person have has a combination of good and helpful characteristics it will always help and it will makes your life easier. Intelligente person will always think about things which he says, smart person will not be, if it can cause problems to himself and so on.

There is not any easy way to be successful. You can not choose only one characteristic to be good, smart or successful person. I definately can't ~~say~~ highlight only one thing which is the most important.

Because, people who I like and respect have a lot of great characteristics. All of us should be individual, all of us should try to be the best version of themselves. To be successful person you should be able to found your mistakes in the past, and ~~work~~ work with them today. You need to ~~analyze~~ analyse everything you do. All of this ~~things~~ work will help you

to build your own personality. You will be ambitious person in the future.
To conclude my thoughts, I can say that there is not any formula of how to be a successful person. ~~There is not one the best~~ people do not have the best one characteristic. You need to think about your actions, and try to do your best.

Nowadays we can see a lot of teenagers in different works (shops, in super market, in restaurant and etc.) But should teenager go to work? So, I will try to answer for this question in this essay.

Firstly, they learn to be responsible and will have a good ability for future job where they have constant work. Secondly, they learn new things in social life which you won't get at school.

On the other hand, they must get a good education and study for this. I think it will be hard to study and work. Also, teenagers are children so they must get a lot of fun from life before having work and adult life.

In conclusion, I can say that it has good and bad sides, but I think that it is their choice how they spend their time.

Hi my English friend! How are you? I see your email and I'm going to answer to your question!

How to study better? The main advice that I want to tell you is ~~concent~~ passion. You should concentrate to your studying and please stop ~~attending~~ ^{pay attention} your study time to the other unnecessary things. You can do it on your holidays! Because this is the main mistake of studying online. When I was studied online I usually played games and my marks didn't increased. I lost my concentration on studying online. My second advice is trying! You should try to study better and well! I know it seems impossible, but don't stop trying and give your all time to your studying. Don't forget you are the best and you can do

In my opinion we would recycle a trash and other. Also stoping a polution the planet. (Our people think the save planet and saying) if so we should clean the our planet. I really want to our people recycle a plastic pack and bottle, toys and other trash, because they planet very polute.

Also they we would stop a military and not migration. It the fact's but in polution. peoples: I think a recycling the Kazakhstan if a in actual years it verb's if a teenagers. In statistics very polit conty is a India. ~~the~~ Kazakhstan don't very clean contry, but isn't very polit. If so, its statisticka. If both ~~we~~ they watch the statisticka we should clean the use country also we should save the use country in the fire, because in statisticka ~~we~~ 40% problem in the Kazakhstan fire and rain. if so fire if a my actual a verb's in a US, Italy, Australia and other country.

Although most people would like to live a good environment but not more people would like a recycle trash and other pack. and this is a big problem. At the end I will say one verb's - "good jobs = good environment and very cleanly country."

F) What is the most important characteristic that a person can have to be successful in life.

Success is ~~the~~ one of the most discussed theme in our society. Everybody wants to be successful and reach something in life, have purpose, aims. I think that skill of communication and understanding other people is most necessary to build success. Firstly, you have to communicate with people in every area of work. You can get from them experience, wisdom, advices. You can talk with people who already have reached success or stand in higher status. Secondly, we always depends on each other and we have to be in a good relationship with our coworkers, without boss. Communication is important skill and we have only elevate it. Thirdly, most business books and success experts agree with this, they claim that we have to be more polite and accurate with words. Call people by their name as it helps to feel sense of own importance, call people "dear", say words like "please", "sorry" and etc. On the other hand, I agree that characteristics like honesty, intelligence, a sense of humour are also important.

Bestseller of all time "How to communicate with people and have friends" by D. Carnegie claims that the characteristic of communication ~~with~~ people is ~~the~~ irreplaceable and changes each area of your life.

E) I think that mobile games are the best option for the current teenagers. It is the best choose for kill time. Because nowadays we have a lot of types of gadgets where we can play a lot of different games. For example 3D games or VR. Some people think that 2D games are better but I think that 3D games have best options for today's gamers. In 2D games like "Mario" or "Terraria" you can move only to the left sides and right sides. In 3D games you can moving how you want. You can choose your character and character can be like a girl like a boy. You can change any details like a ring, sword, colour of hair, colour of eyes, hairstyle, nationality and another details. VR games is too interesting because we can live in another world there good and realistic characters and graphic, you can choose with whom you will be friend or who will be your enemy, you should achieve special achievements in the game for that game give you things that can be help you survive at this world. I think that all games is cool and interesting, but most of them I like playing 3D and VR games.
